NetServices Plc Achieves Cisco Master Managed Services Certification

Company Recognized as Having Highest Level of Expertise in Developing and Delivering Managed Services

October 2009 – NetServices Plc announced today it has achieved the [Master Managed Services Certification](#) from Cisco. This certification recognizes NetServices as having attained expertise in all phases of the Cisco® lifecycle methodology, described as “prepare, plan, design, implement, operate, and optimize.”

Additionally, NetServices can offer “white label” network operation services to other enrolled partners in the program - reflecting a broader capability that supports partner to partner collaboration in deploying Cisco based managed services.

Mark Vickers, CEO of NetServices, said of the achievement: “We are extremely pleased to have our hard work recognised by Cisco and be awarded the Master Managed Services Certification. The accreditation is a natural compliment to our existing customer offering and reinforces our position as a leading Managed Services provider. This disintermediation of the carrier puts us in a strong position of being able to offer customers the best possible service, overseen from start to finish by ourselves, carried out to our own high standards.”

The Cisco Master Managed Services Certification recognises a solution provider’s investment in the ITIL® processes, practices and tools necessary to provide high-quality [managed services](#). As a Cisco Master Managed Services Certified Partner, NetServices has demonstrated the ability to deliver sophisticated solutions, met stringent requirements that reflect a depth of capabilities, and undergone an independent audit by an objective third-party auditor. NetServices was also required to offer at least two managed services using the resources and procedures necessary to deploy, manage and support Cisco solutions.

“ NetServices’ investment in the Cisco Master Managed Services certification ranks it among an elite group of channel partners with the resources to deploy, manage and support services

for multiple technologies,” said Edison Peres, senior vice president of the worldwide channels go-to-market group at Cisco.

In addition, as announced on 7th May 2009, NetServices has achieved [Cisco Powered](#) managed service designations in Cisco Powered Managed Connectivity and Cisco Powered Managed Security.

[Cisco Powered](#) managed service designations acknowledge that a [managed service provider](#) has invested in industry-leading Cisco architectures and that its services have met the highest Cisco user-experience standards.

About NetServices Plc

www.netservicesplc.com

NetServices Plc is a Manchester based, innovative Managed Services provider, specialising in providing services based around comprehensive networking solutions.

NetServices holds a unique position in the UK network service provision market, owning its own network infrastructure and managing its [own data centre](#), which connects into its nationwide Quality of Service (QoS) enabled core network.
